

ESSENTIAL ALGAE REMOVER

5L **25L** SKU: SC4U_ERC_ALG05 / SC4U_ERC_ALG25

DESCRIPTION

Professional outdoor algae & organic growth remover - apply & enjoy long-term cleaning

SC4U ESSENTIAL ALGAE REMOVER is a high performance cleaner designed to eliminate persistent and seasonal algae deposits, green moss, green slime and more from external surfaces. Once applied, it will work without brushing or spraying - just sit back and watch! Suitable for patios, roofs and driveways, it is a highly effective microbiological biocide that kills algae quickly and is safe around pets and children once dry. Apply neat for quick results on heavy contamination, or apply up to 1:20 for less dirty areas. Essential Algae Remover's unique formula is safe to use and fully biodegradable. Use annually for complete protection - where any algae and green moss appears during the year, around down pipes and drains, treat locally. You do not need to retreat the whole area.

HOW TO APPLY

Before use, remove any loose debris from the work surface and ensure you have adequate personal protection, i.e gloves, suitable protective eye-wear, face mask & clothing.

- NOTE: Following the instructions below, perform a small test application in an inconspicuous area to determine suitable dilution rate and dwell time. This will indicate the suitability and effectiveness of the product for your surface. If unsuitable for your requirements DO NOT PROCEED; contact us to return the product.**
- For typical applications: using a pneumatic garden sprayer or water can, add one part **Essential Algae Remover** to 20 parts water (1:20).
- Mix well and use at a rate **NOT EXCEEDING** 5 square metres per litre, approximately 50sq feet area.
- Apply a flood coat spraying in sweeping motion across the surface. A second pass may be necessary to ensure complete coverage.
- Allow to soak in and completely dry on surface - **DO NOT WASH OFF**. Any algae and green moss will disappear within days and not return for up to 12 months where another application will be necessary. Note: very stubborn moss may require a further treatment and should be dislodged with a hose or sprayer if it clings to roof tiles or similar surfaces.

Please Note: do not apply Essential Algae Remover when the threat of rain is imminent. Always try product on-site in an inconspicuous area prior to use. Extra caution is required when applying near or around fish ponds or similar. If you accidentally over-spray onto delicate plant life, rinse off with clean water.

COVERAGE

1:20 dilution (low to moderate contamination) approximate coverage 100M² per 5L. Coverage areas will vary depending on surface contamination and method of application.

USAGE GUIDELINES

Dwell Time	Applications/Coats	Application Method	Dilution
20-30 mins	1-2 applications	Roller/Brush/Sprayer	1:5 - 1:20
